- Charging Base
- Power Adapter
- Lithium Battery
- Instruction Manual
- 1 Year Warranty

PEACE OF MIND

1 LOCATE YOUR CHILD

Your child wears the watch and you can track it with the receiver. When you press the find button, your child's watch beeps and LEDs on the receiver point in the direction of your child. Feel secure when taking your child to the mall, park, or any public area.

2 SYSTEM IS EXPANDABLE

You can purchase 3 additional watches to monitor a total of 4 children. Be alerted when any of them travel out of range. (Watch model#: CT1001)

3 PARENT LOCATOR BUTTON

A button on the watch allows the child to call the parent's unit. The parent's unit will beep and alert the parent.

4 BE ALERTED WHEN YOUR CHILD MOVES OUT OF RANGE

The receiver will beep when your child walks a certain distance from you. You can set the range (16-32ft, 26-65ft, 49-98ft) to ensure that you will always be alerted when your child is too far away.

KNOW HOW CLOSE YOUR CHILD IS

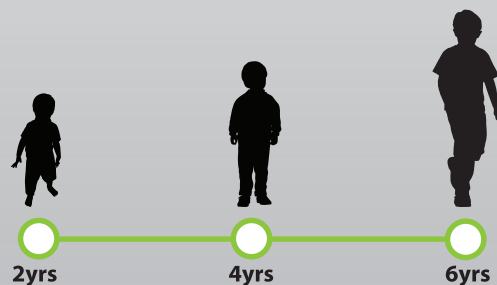

The receiver beeps faster and the LEDs blink faster when your child is close, and they slow down when your child is far.

LOW BATTERY INDICATOR

When the battery on the watch or receiver is low, the power LED will flash red.

RECHARGEABLE WATCH FOR EVERYDAY USE

Convenient charger base and rechargeable lithium battery for watch.

Use the Child Tracker throughout your child's early years!

Model# CT1000
